

**IN THE SPECIFICATION:**

Please delete the Title and add a new Title as follows:

**COSMETIC COMPOSITION CONTAINING A POLYMER AND A FLUORO OIL**

Please delete the Abstract and add a new Abstract as follows:

The invention relates to a physiologically acceptable composition, especially a cosmetic composition, comprising at least one liquid fatty phase which comprises at least one fluoro oil, wherein the at least one liquid fatty phase is structured with at least one structuring polymer with a weight-average molecular mass of less than or equal to 1,000,000, wherein the structuring polymer comprises a polymer skeleton having hydrocarbon-based repeating units containing at least one hetero atom and optionally at least one fatty chain chosen from at least one pendent fatty chain and at least one terminal fatty chain, wherein the at least one fatty chain comprises from 6 to 120 carbon atoms, is linked to the hydrocarbon-based units, and is optionally functionalized.
